

Activity Design for PhET simulations

phet.colorado.edu

<p>Traditional Lesson: Add 100 silver bromide pairs to the water. How many silver and bromide ions dissolve in the water? Repeat this for all salts.</p>	<p>Inquiry based Lesson: Investigate different salts. What features do salts have in common, and how do salts differ from each other?</p>
---	--

Creating Activities using a Guided Inquiry Approach

1. Specific learning goals
2. Students reason and make sense
3. Connect to students' knowledge
4. Connects to real-world experiences
5. Collaborative activities
6. Minimal directions for simulations
7. Students self-check understanding

Start writing an activity using by using this planning guide:

- 1. Brainstorm some learning goals that the simulation would support.*
- 2. Write one goal.*
- 3. Which guidelines would you like to use?*
- 4. Outline or map your lesson.*
- 5. Start a rough draft.*
